

URBANMIND-X

Problem :

Cities generate large volumes of data across governance, infrastructure, public services, transportation, and citizen interactions, but decision-makers often lack intelligent systems to transform this data into actionable insights. UrbanMindX was conceptualized to bridge this gap through AI-powered urban intelligence and decision-support capabilities.

Tech Stack :

Frontend Layer

- React.js
- Next.js
- TypeScript
- Tailwind CSS
- Mapbox GL JS
- Leaflet
- Three.js
- Deck.gl

Backed Layer

- FastAPI
- Python
- REST APIs

Database Layer

- PostgreSQL
- SQLAlchemy ORM
- Alembic
- PostGIS
- Redis

AI & ML

- OpenAI
- Langchain
- Scikit-Learn
- PyTorch
- YOLO

Visualization

- MapBox
- Leaflet
- Three.js
- CelsiusJS
